

BioTek
Gen5™
Data Analysis Software

Is your valuable microplate reader data protected?

Gen5™ Secure Data Analysis Software can help your laboratory maintain compliance to 21 CFR Part 11 and GxP requirements. With Gen5 Secure's integrated administration tools, installation and configuration is straightforward, and doesn't require additional software. Gen5 offers flexible, fully customizable options and permissions for all security and user-related settings.

Gen5 Secure is fully validated to meet the US FDA and ISO 9001/ISO 13485 requirements, and includes a validation package to support individual laboratories' validation requirements.

Customizable electronic signature actions in Gen5 Secure

Features:

- Multi-level users and groups: permissions to data, system and protocol functions
- Data, system and audit trails record operator actions and data modifications
- Electronic signatures for data and protocol files, with customizable signature reasons
- Windows authentication (single sign on) option and email event alerts

Gen5 Secure protects data collected from all of BioTek's microplate readers, including:

Epoch™ 2

Synergy™ H1

Cytation™
