

Introducing Trial Size from CST.

Select primary, unconjugated antibodies and antibody sampler kits are now available in a 20 µL Trial Size, or T-Size. T-Size is currently offered for certain antibodies in the following research areas:

Apoptosis, Autophagy, and Cell Cycle/Checkpoint Control

Why Trial Size?

» Support early-stage target exploration

» Minimize reagent waste for small-volume assays

» Test before you invest

See the current Trial Size* product listing at: www.cellsignal.com/trialsize
